

# JD: Salesforce Senior Developers

LOCATION: AUNDH, PUNE  
Email: [Jobs@Sarvaha.Com](mailto:Jobs@Sarvaha.Com)

Sarvaha is looking for senior Salesforce developers based in Pune with minimum of **3 years** of professional experience. You will be responsible for solution development, client project delivery, creation of intellectual property and technical presales activities working closely with the US delivery and sales teams.

Expectations for the role are to deliver innovative and high quality solutions to our clients using deep knowledge of Salesforce platform. We specialize in Sales, Service, App Cloud and Communities products from Salesforce. We will expand our scope to include Wave and Marketing Cloud products in the near future.

## Key Responsibilities

- Work as an individual contributor as part of delivery teams for creating technical solutions based on Salesforce products and platform
- Contribute to intellectual property in the form of lightning based tools, accelerators & industry solutions
- Work under the guidance our team leaders for mapping business process requirements to the capabilities and features of Salesforce products.
- Contribute technical knowledge to the design process to derive maximum benefits from the Salesforce platform and products
- Contribute in scoping, estimating and proposing of technical solutions and supporting the sales teams in client interactions.
- Create technical POCs & solution demos with Lightning UI to support sales & marketing efforts
- Investigate new technologies; provide analysis and recommendations on technical choices
- Responsible for providing hands on expert level assistance to developers for technical issues
- Interact directly with customers on a need basis under the guidance & direction of Team Leaders
- Mentor and guide technical team members

## Skills Required

- BE/BTech/MTech (CS/IT or MCA), with emphasis in Software Engineering is highly preferable
- **3+** years of total experience with at least 2+ years of delivering Salesforce solutions
- Demonstrated knowledge and experience with SFDC technologies with emphasis on Sales, Service, Communities and App Cloud products. A demonstrated specialization in at least two of Sales, Service or Custom applications is necessary to succeed in this role.
- A thorough understanding of data modeling & enterprise application integration concepts & tools
- At **least 2** SFDC Certifications in App Builder, PD I, Sales Cloud or Service Cloud are required.
- Clear verbal and written communication
- Team player with strong listening and interpersonal skills; attention to details
- An attitude of constant learning of new skills; desire to take on constructing feedback/coaching

## Position Benefits

- Top-notch remuneration
- Work with industry best Salesforce developers and architects
- Excellent, no-nonsense work environment with the very best people to work with
- Paid-for certifications and training
- Highly challenging and cutting edge work
