You will be responsible for building continuous integration (**CI**) and continuous delivery (**CD**) pipeline for **multiple AWS** cloud based applications. You will be expected to work with a globally distributed team and contribute independently as well as lead a team of DevOps engineers. This is a hands-on position that would require you to design and build the CI/CD pipeline.

## Key Responsibilities

- Lead the team and as an individual contributor create CI/CD pipeline
- Contribute in scoping, estimating and proposing of DevOps solutions & development
- Develop CloudFormation templates and automate build and deploy

## Skills Required

- BE/BTech/MTech (CS/IT) or MCA, with emphasis in Software Engineering is highly preferable
- Minimum 8+ years of total experience with at least 3+ years of **DevOps** experience
- AWS knowledge & experience in development of CloudFormation templates (JSON/YAML)
- Development knowledge and experience including Lambda, Groovy, Bash, TypeScript
- GIT knowledge and experience including Branching, Merging, Rebase, etc.
- CI/CD Pipeline knowledge and experience including using AWS tools and services such as AWS CodeBuild, CodePipeline, CodeDeploy, CodeCommit
- Docker / AWS ECS / Micro services Knowledge and Experience
- Experience with automation.
- Experience working in an Agile environment including use of Confluence and Jira. Proficient understanding of client-side scripting and JavaScript frameworks
- Nice to have exposure to JFrog Artifactory, NodeJS, NPM,
- Nice to have experience in Linux and Network Administration and AMI hardening Experience
- Excellent verbal and written communication
- Strong listening and interpersonal skills; attention to details
- An attitude of constant learning of new skill

## Position Benefits

- Top-notch remuneration
- Work with industry best developers and architects
- Excellent, no-nonsense work environment with the very best people to work with
- Highly challenging and cutting edge work
