

# JD: Windows Admins with Network and Security background Skills

LOCATION: PUNE, REMOTE

Email: [jobs@sarvaha.com](mailto:jobs@sarvaha.com)

Sarvaha would like to welcome experienced Microsoft Windows Admins with minimum of **3 years** of professional experience (more experience is desired) in cloud based deployments and automation. Sarvaha is a niche software development company that works with some of the best funded startups and established companies across the globe. You will be expected to work with a globally distributed team and contribute independently as well as lead a team of engineers. This is a hands-on position that would require you to be responsible for complete end-to-end rollout of products across global availability zones.

## Key Responsibilities

- Provide support for enterprise programs and applications to include VMWare/VMWare ESXi, Exchange Server, SQL Server, SCCM, Windows Server, Citrix, ServiceNow
- Automate deployments and routine tasks using Bash/Python/PowerShell
- Identify improvements to IT documentation, network maps, processes/procedures, and ticketing system
- Analyze & document the advanced architecture & configuration of infrastructure & applications
- Work with customer teams in troubleshooting and keeping the systems up and running

## Skills Required

- **Minimum 3+** years of experience in enterprise Windows and Active Directory administration
- Strong experience in managing **Azure AD/Intune/SCCM/0365/VMWare/ESXi with network and security** background
- Experience with public cloud (**Azure/AWS/GCP**) is highly desired. Azure Certified is a plus
- Excellent verbal and written communication and strong interpersonal skills are requisite for success of this position. You should have experience dealing with difficult situations and resolving them in positive manner
- Strong listening and interpersonal skills and attention to details is highly desired

## Position Benefits

- Top-notch remuneration with non-linear growth
- Work with industry best cloud architects, DevOPs team and developers
- Excellent, no-nonsense work environment with the very best people to work with
- Highly challenging and cutting edge work with Fortune 500 businesses and create an impact on the information security of millions of IT assets and critical data.
