

# JD: Network and Security Specialist

LOCATION: PUNE, REMOTE

Email: [jobs@sarvaha.com](mailto:jobs@sarvaha.com)

Sarvaha would like to welcome experienced Network and Security Specialist with minimum of **4 years** of professional experience in responsible for overseeing the computer networks for any security threats or unauthorized users. Sarvaha is a niche software development company that works with some of the best funded startups and established companies across the globe. You will be expected to work with a globally distributed team and contribute independently as well as lead a team of engineers. This is a hands-on position that would require you to be responsible for complete end-to-end rollout of products across global availability zones.

## Key Responsibilities

- Identify malicious network activity to understand the effects on system and information
- Evaluate log files from different sources such as network traffic logs, firewall logs and application logs.
- Assess configuration risk and vulnerability in the cloud.
- Work with customer teams in troubleshooting and keeping the systems up and running

## Skills Required

- Minimum 4+ years of total experience with cybersecurity
- Enterprise-grade Vulnerability Scanning and management platforms (ex: Qualys, Tenable, Rapid7, Nessus, etc.)
- Understanding of various operating systems, common applications, network and security devices and architecture as they relate to vulnerabilities
- Familiarity with security and risk standards including ISO 27001-2, PCI DSS, NIST, ITIL, COBIT is an added advantage
- Excellent verbal and written communication and strong interpersonal skills are requisite for success of this position. You should have experience dealing with difficult situations and resolving them in positive manner
- Strong listening and interpersonal skills and attention to details is highly desired

## Position Benefits

- Top-notch remuneration with non-linear growth
- Work with industry best cloud architects, DevOPs team and developers
- Excellent, no-nonsense work environment with the very best people to work with
- Highly challenging and cutting edge work with Fortune 500 businesses and create an impact on the information security of millions of IT assets and critical data.
